DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Lee (US 5,838,856).

In terms of claims 1-4, 8-10, Lee discloses an optical fiber connection structure wherein optical fibers (1), shown in Fig. 4, are connected by means of a component for connecting optical fibers comprising two plugs (119), into which at least one optical fiber has been inserted respectively for aligning said optical fibers and connecting them, and an adapter (150) for fixing said plugs, which comprises that the plugs are fixed to the adapter by attaching each plug into which the optical fiber has been inserted to the adapter in a direction perpendicular to the axial direction of the optical fiber. The plug or adapter is equipped with a latch member (130) and the other has a latch engaging section (119 engages 134). The plug or adapter has a guide(s) (117) for alignment and the other is equipped with a member for alignment with engages with said guide. The plugs and adapter have a through-hole(s) for alignment (153).

In terms of claims 5-7, the plug is equipped with one or plural ferrules (117), each ferrule of said plug is equipped with a ferrule aligning member capable of sliding in a

direction of the center axis of the optical fiber and the ends of ferrules brought face to face with each other are located inside said ferrule aligning member (151) as a result of sliding said ferrule aligning member in a direction of the center axis of the optical fibers.

The method steps of claims 11-16 are disclosed by Lee in the explanation of the separate components functioning together. The resulting structure is the assembly of all the various components aligning as one module. The relevant steps can be found in Figure 1-4.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hoang Tran whose telephone number is 571-272-5049. The examiner can normally be reached on 9:00AM - 5:00 PM.
